Abstract (en)

[origin: CA2763366A1] The invention relates to a device for connecting two electrical lines to essentially tubular connecting elements (1, 2) of drill pipes (32), that are screwed together. Said device is characterised in that a first electrical contact element (10) is arranged on one connecting element (1) in such a way that it can move in the rotary direction of the connecting element (1), and a second electrical contact element (23) is fixed to the other connecting element (2).
