Abstract (en)

[origin: EP2441424A1] The chair (2) has a base (10) supported by a frame, and a backrest (20) articulated with respect to the base around an axis. Two foot-rests are provided with respective arms such that each arm (1021) is articulated with respect to the base around another axis, where a pallet (1024) is supported by each arm. The foot-rests include a set of electric jacks (104) for adjusting the angular position of the arms around the latter axis, and another set of electric jacks for adjusting the position of the pallets parallel to a longitudinal axis (A21) of the arms.
