Abstract (en)

[origin: EP2441700A1] The assembly (10) has a stiffening element (18) connected with an upper frame (38) at longitudinal sides (48.1, 48.2) and transverse sides (50.1, 50.2). The stiffening element has stiffening bars (60.1, 60.4) for connecting the longitudinal sides and the transverse sides with one another, respectively. End regions of the bars have a transition region and an expanding region arranged adjacent to a fastening region. The expanding region has a turning point, where a ratio of length of the expanding region to length of the transition region lies in a range from 2.5:1 to 5.9:1.
