Abstract (en)

[origin: EP2441895A1] The invention relates to a combination of a flush reservoir (10) for a toilet, a wall (2) arranged in front of the flush reservoir (10) and an operating element (6,7,8,9) for operating the flush reservoir, wherein the operating element is arranged on the wall outside the projection of the flush reservoir. The wall can optionally comprise an opening, wherein the operating element comprises a frame (3), which frame is arranged at least partially in the opening and wherein the front surface of the frame lies flush with, or recessed relative to, the front surface of the wall.
