Abstract (en)

[origin: EP2441968A1] The device has electrical contacts (36, 37) attached to mounting surfaces for coupling electrical coupling devices arranged adjacent along an alignment axis. A socket (28) and a plug (44) are provided electrical contacts with an electrical and/or fluidic attachment module attached to a connection plate. A conductor plate (35) and the electrical contacts are partially surrounded by a housing. The housing is formed for a mechanical connection between the coupling devices and a receiving shaft. The electrical coupling devices are held in the receiving shaft.
