Abstract (en)
[origin: EP2442237A2] A user equipment (UE) and method are provided for displaying items associated with selected media content and to cycle such that multiple items are displayed over time. A UE is provided that includes at least one component configured to display a plurality of items provided in a filmstrip format and associated with a plurality of content and to cycle the items in the filmstrip format. A method therefore is also contemplated.
