Abstract (en)
[origin: WO2010147558A1] A collar protector (20) for receiving a shirt collar is disclosed, which is movable between an open jaw position which facilitates placing the collar (30) within, and a closed position which creates a collar protecting region around the collar that is crush-resistant. The remaining portion of the shirt can then be rolled around the closed collar protector to form a compact package. The collar protector may form part of a garment carrier for packing of a shirt (30) in which the shirt is received by a cover (10).
