Abstract (en)  
[origin: WO2010147514A1] The invention relates to cooling arrangement for a vehicle (90), wherein the arrangement comprises cooler component (120) and a casing wall (12a) for the vehicle (90) which defines an intake of ambient air to said cooler component. A front surface (130a) of said cooler component (120) is arranged in said intake substantially flush with the casing wall (12a).
