Abstract (en)
[origin: EP2443951A2] A multiple use anatomic sandal that consists of: 1) A bottom-sole (detail nr.1 In the figures) made out of expanded polyurethane with specific gravity 35%-40% or similar material. The sole has an internal support in the form of a shank (detail nr.4 in the figures) or a rubber strap in order to hold its shape, and a interior anatomic curve on the surface that provides space for the flexing of the toes during walking (detail nr.5 in the figures). There is also an external anatomic curve on the sole (detail nr.6 in the figures). 2) Straps, that wrap around preordained positiong-guides (detail nr.3 in the figures).
