Abstract (en)  
[origin: EP2443982A2] The household device has a line system for process water and a flow heater arranged in the line system. The flow heater has a tube section (15), where a tube section covers an interior chamber (18). The process water is guided in the interior chamber. An interior heating (21) is arranged in the interior chamber in the interior chamber additionally for a wall heating part (20). The tube section is made of metal, particularly steel.
