Abstract (en)

[origin: EP2444324A1] The thermoforming packaging machine (1) has a stretching station (12) for stretching a sheet (11) with a heating device, a printing mark sensor and a clamping device. The stretching station has a film cooling device with a cooling plate. The film cooling device lies on another side of the sheet than the heating device. An independent claim is also included for a method for stretching a sheet on a thermoforming machine.
