Abstract (en)

[origin: EP2444566A2] The arrangement has a sealing element (6), which is arranged between attachment seals (4,4') in an overlapping area. The sealing element has a base body (7), where a comparatively elevated sealing strip (8) is attached. The sealing strip is tightly fitted on a sealing surface of the attachment seals. The sealing strip is made of a butyl tape. The base body is made of elastic material, particularly foam rubber, fiber-reinforced plastic or breathable waterproof foam. An independent claim is also included for a sealing element for an arrangement.
