Abstract (en)

[origin: EP2444584A2] The roller door (4) has a flexible door curtain (5) and a rotatably mounted, drivable winding shaft (12) that is provided for receiving and moving the door curtain between end positions. A vertically oriented relaxation channel (24) is arranged in a door column (10,11) of a guide slot (16). An independent claim is also included for a door column with a wall side.
