Abstract (en)
[origin: EP2444736A2] The device (8) has a display region (22) formed at an upper side of a control element (16) i.e. turning tilting control knob, and comprising an optical enlarging element (17) i.e. magnifier. The optical enlarging element enlarges represented information against original size of the information. The control element comprises an information generation unit. The optical enlarging element is arranged along direction of a longitudinal axle of the control element over the information generation unit for increasing the information produced in the control element. The element comprises a recess.
