Abstract (en)

[origin: EP2444757A1] The assembly has two connection units (6) connected with hose lines i.e. connection lines (12), and a connection element (1) connected with connection units by the hose lines. The hose lines are formed as flexible plastic-hose pieces, and the connection units are locally and variably arranged at a radiator (10). The connection element is formed as a brass casing, an angular piece or a body element, which comprises a fastening point for the hose lines and a connection hole connected with the fastening point. The connection units are made of metal.
