Abstract (en)

[origin: WO2010149889A1] The invention relates to a composition of ion-exchange resins made from a styrene-divinylbenzene copolymer or an acrylic-divinylbenzene copolymer filled with at least one lipoaminoacid with the formula (I), in which R1 is the chain characterising a fatty acid, saturated or unsaturated, linear or branching, comprising 7 to 21 atoms of carbon, R2 is the chain characterising an amino acid and m is between 1 and 50, or a mixture of said compounds with the formula (I).
