Abstract (en)
[origin: WO2010149517A2] The invention relates to a refrigeration device, in particular a domestic refrigeration device, comprising a plastic component (15), in particular a plastic blank for a delimiting wall (7) for delimiting a hollow space of the refrigeration device, which is filled with a thermally insulating foam (3). According to the invention, the plastic component (15) is manufactured from a natural-fiber reinforced plastic consisting of a plastic support material (21) and natural fibers (23) embedded therein.
