Abstract (en)

[origin: WO2010121778A1] The invention describes a system for constraining lenses in an eyeglass frame. The system comprises a monolithic frame open in the centre, equipped at the two extremities with two elastic elements, equipped in the centre with two pad- carrying fasteners having a hook-shaped area, which hinges in suitable seats near to the lower bridge thereof, which, fastening into suitable seats formed near to the upper bridge of the frame itself, rigidly lock two lenses, equipped with two grooves that engage the frame itself.
