Abstract (en)

[origin: CA2766332A1] The invention relates to a high-voltage arrangement (10) having at least one switching device (20), a housing (300) and a drive (200) for the switching device. According to the invention, the housing (300) has a first housing opening (320) and a second housing opening (330). Both the first and the second housing openings are suitable for the selective fitting of a viewing window (350) or a ground contact connection (50).
