Abstract (en)

[origin: EP2446777A1] The joint component (11) has a fastening section at which a fastening device is arranged for fastening a supporting leg (4) at the component. A connection section is provided with three connection units. Each connection unit connects a cross-beam (12) with the component in different angle positions around one of axes with respect to the component. The axes are aligned parallel to each other. The connection units are arranged at a distance from each other in a straight line running at a distance from the fastening device. An independent claim is also included for a frame for a desk comprising a joint component.
