Abstract (en)
[origin: EP2447146A2] The present invention relates to a surfboard formed according to a longitudinal configuration of varying widths, comprising an area (1) in the front part and an area (2) in the rear part determining respective transverse widenings with respect to a narrower area (3) of the central part, with a determined ratio between the maximum widths (H1 and H2) of the areas (1 and 2) and the minimum width (H3) of the area (3), as well as a determined ratio of the location of said widths (H1, H2 and H3) with respect to the total length (L) of the board.
