Abstract (en)

[origin: EP2447424A1] The piece (1) has a deflection section (4) attached to an upper downpipe section (2). A supply section (7) opens into the piece in a region of the deflection section. The deflection section has a deflection region (8) for deflecting sewage with respect to a drop direction (F) and another deflection region (9) successively arranged with respect to the former deflection region in the drop direction. The latter deflection region runs inclined to the drop direction, where the sewage is fed from the former deflection region to the latter region.
