Abstract (en)

[origin: EP2447940A1] A method of and apparatus for receiving a request from a communication device for access to a webpage comprising a text portion; receiving from a first content provider server the webpage comprising the I text portion; identifying the text portion; embedding into the webpage a link for providing audio data corresponding to the text portion; transmitting the webpage embedded with the link to the communication device; receiving from the communication device a request for audio data corresponding to the text portion; generating audio data corresponding to the text portion using a text to speech convertor; transmitting the audio data to said communication device; wherein during the step of transforming the text portion into audio data a preliminary audio data content, is provided to the communication device so that the preliminary audio data content can be played on the communication device while the audio data corresponding to the text portion is being generated and streamed to the communication device.
