Abstract (en)

[origin: WO2011000431A1] The present invention relates to a support frame (10) for arranging module units in a service vehicle (26), wherein four elongated elements (1) form four corner columns (17) of said support frame (10), wherein each of said elongated elements (1) comprise four element sides (2, 3, 4, 5) forming a generally rectangular cross section of said elongated element (1). Said first element side (2) and said fourth element side (5) adjacent said first element side (2) comprise fastening means (8, 16) for arranging a module device at said support frame (10).
