Abstract (en)
[origin: WO2011000432A1] The present invention relates to an elongated element (1) for arranging module units in a service vehicle, comprising four element sides (2, 3, 4, 5) forming a generally rectangular cross section of said elongated element (1), wherein a first element side (2) comprises fastening means (6) for arranging a module device at said elongated element (1). A second element side (3) comprises at least one undercut groove (7) extending along said elongated element (1).
