Abstract (en)
[origin: WO2011000751A1] The invention relates to a drawer (1) that can be extended from and retracted into a furniture body, comprising a bottom (2), a front panel (3), two lateral frames (4, 5), and a back wall (6) that is positively and/or non-positively connected to the end regions of the lateral frames (4, 5) via corner joints (7), wherein each corner joint (7) is made of a first connecting part (8) and a second connecting part (9) that is connected in a pivotable manner to the first. The second connecting part (9) comprises at least one detent means (12) that can be connected to the first connecting part (8) and/or to the back wall (6), wherein the second connecting part (8) is connected to an adapter (15) associated with the end region of the lateral frame (4, 5).
