Abstract (en)
[origin: WO2011001404A1] The invention relates to a bottom cutter assembly for a dry shaver, a dry shaving apparatus and a shaving method, wherein the bottom cutter assembly (10) has a top cutter (12) with holes and a bottom cutter assembly that can be driven by a motor to oscillate to each other. The bottom cutter assembly (10) has at least one first bottom cutter (14) and a second bottom cutter (22; 32; 34; 36; 38; 40; 42) that precedes the first bottom cutter (14) in the direction of the oscillating movement, which second cutter is designed to exert a tensile force on a hair (18) extending into the hole (20) of the top cutter (12) in order to pinch the hair between the second bottom cutter (22; 32; 34; 36; 38; 40; 42) and the top cutter (12).
