Abstract (en)
[origin: WO2011000445A1] The invention relates to a coffee portion container (1) of the disposable type, made of an airtight and aroma-proof material and subdivided into a first portion chamber (3) and a second portion chamber (4). Said chambers are each closed by an airtight and aroma-proof tear-off foil (6, 7) having a grip tab (10, 11). The coffee portion container (1) that is formed as a hollow cylinder and a separating wall (5) subdividing the container are molded as a single plastic piece. The hollow cylinder comprises a circumferential, flat edge (8, 9) at each of the two ends thereof, that serve as an adhesive surface for one of the tear-off foils (6, 7).
