Abstract (en)

[origin: WO2011019271A2] The present invention relates to a road construction for providing a road connection which can be cleaned, comprising:
- an open road surface structure suitable for the passage of a liquid, - a liquid discharge assembly for discharging the liquid from the open road surface structure, and - a liquid supply assembly for supplying liquid in the open road surface structure, wherein the open road surface structure can effectively function as transport layer for the liquid from the liquid supply assembly in the direction of the liquid discharge assembly. The present invention also comprises a method for cleaning a road surface. The present invention further comprises an asphalt composition.
