Abstract (en)

[origin: WO2011000004A1] The invention relates to a drop-safety mechanism for a firearm having a pivot-mounted trigger (18), said trigger (18) being designed as an arm of a double lever the other arm (38) of which supports a counterweight (39) that can be displaced between a rest position and a functional position and that is resiliently pre-tensioned in the rest position and that abuts on a part (28, 30, 44) of the firearm in the functional position to block the trigger (18).
