Abstract (en)

[origin: WO2011000377A2] The invention relates to an actuator attachment (1) for actuating a radiator valve, comprising a housing (2) which has a drive section (3) and a fastening section (4) having a fastening geometry (6) for connection to a radiator valve. In order to allow an easy adaptation to radiator valves of different fastening geometries, the fastening section (4) can be detached.
