Abstract (en)

[origin: WO2011000533A1] The invention relates to a method for transmitting vehicle data in the form of kilometer readings of a motor vehicle (1) to a memory element (7) having a counter, said memory element being removable from the motor vehicle. At time intervals, the kilometer reading of the motor vehicle (1) is transmitted to the memory element (7), and after each kilometer reading transmission, the difference between the last transmitted kilometer reading and the newly transmitted kilometer reading is added up by the counter.
