Abstract (en)

[origin: WO2011000656A1] The invention relates to a clamping holder (1) for fastening a display means (5) to a base (8). The clamping holder (1) comprises a holding element (2). A first clamping member (4) for retaining the display means (5) is provided on one end (3) of the holding element (2) and a second clamping member (7) for fastening the holding element (2) to the base (8) is provided on a second end (6). The clamping members (4, 7) are interspaced by a web (10). The first clamping member (4) defines a first clamping plane (5a) which is offset by an angle with respect to a second clamping plane (8a) defined by the second clamping member (7).
