Abstract (en)

[origin: WO2011001287A2] A metal-air battery includes an air electrode and a siloxane material proximate to or incorporated within the air electrode. A method is also disclosed that includes providing a siloxane material, providing a transfer layer, and co-extruding the siloxane material with the transfer layer to form a siloxane membrane. The siloxane membrane may be used in a metal-air battery.
