Abstract (en)
[origin: US2011302686A1] Sports garment adapted to cover at least one limb or body member, such garment including a textile base primarily worn in close contact with the body and including a compression zone surrounding the limb/member, the compression zone including at least one film affixed to the textile base, the film including a plurality of openings. The compression zone includes at least one exclusive compression zone and at least one postural support zone, the yield strength of the garment portion forming the postural support zone being greater than that of the garment portion forming the exclusive compression zone, along at least one direction of bias.
