Abstract (en)

The present invention relates to an anchoring (1) for a motorcyclist protection system, comprising a flat bar having three substantially straight sections (T1, T2, T3) and two bends made in the same direction, the first bend defining a first inner angle  $\alpha_1$  between the first (T1) and the second (T2) section and the second bend defining a second inner angle  $\alpha_2$  between the second (T2) and the third (T3) section, a first section (T1) being intended to be fixed to a post (6) of a vehicle restraint system, the third section (T3) being intended to be coupled with a motorcyclist protection barrier (9), wherein the planes containing the first (T1) and the third section (T3) form an angle  $\pm$  of  $20^\circ \pm 5^\circ$  and the sum of the inner angles  $\alpha_1$  and  $\alpha_2$  is  $200^\circ \pm 5^\circ$
