Abstract (en)

[origin: EP2450489A2] The present invention relates to an anchoring (1) for a motorcyclist protection system, comprising a flat bar having three substantially straight sections (T1, T2, T3) and two bends made in the same direction, the first bend defining a first inner angle α_1 between the first (T1) and the second (T2) section and the second bend defining a second inner angle α_2 between the second (T2) and the third (T3) section, a first section (T1) being intended to be fixed to a post (6) of a vehicle restraint system, the third section (T3) being intended to be coupled with a motorcyclist protection barrier (9), wherein the planes containing the first (T1) and the third section (T3) form an angle \pm of $20^\circ \pm 5^\circ$ and the sum of the inner angles α_1 and α_2 is $200^\circ \pm 5^\circ$
