Abstract (en)  
The element i.e. intermediate profile (6), has holding projections (11) and a holding element i.e. collar sleeve, for detachably connecting the intermediate profile with a pressure plate (1). The intermediate profile is connectable with an insulating element (5). The projections engage with inwardly projecting holding bars (12) at an opening (10) of the pressure plate. Soft plastic lips are formed at the intermediate profile. Inwardly pointing holding bars are arranged for clip or plug connection with the insulating element. The intermediate profile is made of hard plastic. An independent claim is also included for a post-beam-facade comprising a pressure plate.

Abstract (de)  
Die Erfindung betrifft ein Verbindungselement zur Befestigung eines Dämmelements (5) an einer Pressleiste (1) einer Pfosten-Riegel-Fassade. Um eine vereinfachte Befestigung des Dämmelements mit verbesserter Wärmedämmung zu ermöglichen, ist das Verbindungselement ein mit dem Dämmelement (5) verbindbares Zwischenprofil (6) das mindestens ein Halteelement (11; 17; 21) zur Verbindung mit der Pressleiste (1) enthält.
