Abstract (en)

The device has a set of parts placed in a case of the device and provided with a junction element (4) i.e. thermal adhesive tape, between a part (2) i.e. printed circuit board, and another part (6) i.e. radiator or heat dissipater. The element includes an adhesive face (41) receiving the former part such that the face presents a free region (43) adjacent to one of a closed contour (21) e.g. through-hole, or an concave open contour e.g. slot, of the former part after adhesion of the former part on the element. An additional part (8) i.e. light guide, includes an end (83) adhered to the region.

Abstract (fr)

Dispositif d'éclairage et/ou de signalisation de véhicule automobile comprenant un ensemble de pièces, ledit ensemble de pièces comprenant : - une première pièce (2) comportant un contour fermé (21) ou un contour ouvert, - un élément de jonction (4) avec une première face adhésive (41) qui reçoit ladite première pièce de manière à ce qu'après collage de la première pièce sur l'élément de jonction, la face adhésive présente une région libre (43) adjacente au contour de la pièce.
