Abstract (en)
The device has a strip of LEDs positioned in a face (31) that is opposite to another face (32) provided with the LEDs applied against a lamp post. The strip of LEDs is arranged in shape of a belt (3) that is equipped with a mechanical closing unit (4) according to an adjustable dimension loop configuration of the belt for maintenance, by tightening, of the belt around the post. The closing unit and the belt are formed as a single piece. A stud (9) is arranged at a level same as that of a loop (5) on the belt.

Abstract (fr)
L'invention concerne un dispositif de balisage de mât (1) d'éclairage, ledit dispositif comprenant au moins un bandeau de diodes (2) électroluminescentes positionnable par sa face (31) opposée à celle (32) munie de diodes (2) en applique contre ledit mât (1). Ce dispositif est caractérisé en ce que ledit bandeau de diodes (2) électroluminescentes affecte la forme d'une ceinture (3) équipée de moyens (4) de fermeture mécaniques suivant une configuration en boucle de dimension ajustable de ladite ceinture, pour un maintien par serrage de ladite ceinture (3) autour du mât (1).
