Abstract (en)
[origin: EP2450633A2] The device has a base body (10a), a stop element (12a) and a spring unit (14a) movably mounting the stop element relative to a part of the base body. The base body comprises an attachment unit (16a) provided for attachment of the base body at a cooking product carrier (18a). The attachment unit comprises terminals (20a, 21a) arranged at the base body. Another attachment unit comprises a screw terminal connection unit. The spring unit comprises a flat spring (28a) that is formed as a single piece with the base body. An independent claim is also included for a system comprising a cooking product carrier device and a cooking device.
