Abstract (en)
[origin: EP2450658A1] The plastic clip (112) has a guide rail (221) arranged at the contact surface of a manifold of the capacitor, in the assembled state of the clip, and a clamping unit (223) arranged to effect a positive connection between the clip and the manifold, in the assembled state of the clip. A fixing plate (225) is attached to the guide rail in the assembled state of the clip, along the main direction of extension of the capacitor, such that the guide rail, clamping device and mounting plate are realized as one-piece plastic structure. An independent claim is included for fixing method of capacitor of vehicle.
