Abstract (en)

[origin: EP2450875A1] The double reed (1) has two equal plastic reed tongues (2) which are connected to each other along longitudinal edges (10). The reed tongues in the region of the fastening portion (8) are formed in semicircular shape, and are curved in the region of blade section. The upper sides of the reed tongues in cross-section are slightly projected outwardly and a narrow, curved air gap is formed between the reed tongues at free end (11). The reed tongues have stiffening elements made of plastic, which extend over the entire length of the blade section.
