Abstract (en)  
[origin: WO2011005176A1] A tool (1) for releasable fastening in a support (5), such as a beam or an axle, of an agricultural machine has a fastening portion (2), configured to directly or indirectly bear against, and be fixed relative to, the support (5), and a working portion (3). The fastening portion (2) is designed in shape and size to be inserted through a corresponding opening (7) in the support (5), and the fastening portion (2) has an engagement means (9) arranged to engage inside the support with a fixing element (6), so that the fastening portion (2) is pressed against an inner surface (50) of the support. Also shown are an agricultural machine comprising such a tool and a method for fitting the tool to an agricultural machine.
