Abstract (en)

[origin: WO2011005128A2] The present invention is related with fermented products based on milk whey permeate, production processes and uses. More specifically, it is related with fermented products containing at least between 4.75×10^8 and 2.14×10^9 CFU/ml lactic acid bacteria and between 8.50×10^5 and 1.55×10^7 CFU/ml of yeast from kefir. The pH of the product is within the 4-5 range and can exist as a liquid, lyophilized or spray dried product. The product is obtained by fermentation of milk whey permeate with kefir grains and/or a concentrated culture from kefir grains. The fermented product can be in the liquid, lyophilized and dried powder forms and can be used in animals and human beings feed.
