Abstract (en)
[origin: WO2010000607A2] Composition for treating keratin-containing fibres, in particular human hair, containing, in a cosmetically acceptable carrier, (a) at least one cellulose having at least one structural element of the formula (I) where R independently of each other is a hydrogen atom, a (C1 to C6)-alkyl group or a group -CH₂-CHR₁-(O-CH₂-CHR₁-)mOH, where R₁ is a hydrogen atom, a methyl group, an ethyl group or an n-propyl group and m is an integer greater than or equal to zero, with the proviso that at least one of the radicals R is an above-defined (C1 to C6)-alkyl group and at least one of the radicals R is an above-defined -CH₂-CHR₁-(O-CH₂-CHR₁-)mOH group, n is an integer greater than zero and (b) at least one film-forming polymer and/or strengthening polymer, the use of the composition for temporary shaping of hair, and for hair care, in particular as a hair foam.
