Abstract (en)

[origin: WO2011004087A1] Device (1) for mounting front wings (2) on front wing supports (3) of a vehicle, in which method at least one fixing hole is formed in each front wing (2) and support (3) to accept fasteners for attaching the front wings (2) to the respective supports (3), said device (1) comprising a framework (4) supporting means of holding the front wings (2) on the framework (4) and means (51) of positioning the device (1) on the supports (3). The device (1) further comprises: centring pegs (70) fixed to the framework (4) and intended to fit in centring holes (25; 35) formed in each front wing (2) and support (3) near the respective fixing holes; and pressers (71) mounted on the framework (4) and designed to apply force to the front wings (2) towards the respective supports (3). The present invention finds an application in the automotive field.
