Abstract (en)
[origin: WO2011003915A1] The present invention relates to an electro-optically switchable system, which comprises an optically active element (2) and a push-button (41), to a container (3) comprising such an electro-optically switchable system, and to the use of such an electro-optically switchable system for providing containers that allow increased light to pass through into the insides thereof only for the duration of a control intervention.
