Abstract (en)

[origin: WO2011003912A1] The invention relates to an operating unit (11) for an electrical device, such as an exhaust hood, comprises an operating panel (13), an illuminated display and a touch switch including a planar, pressure-sensitive sensor element (30) thereon. The operating panel has at least one opening (17), which is closed by a translucent window (19). At the back (15) of the operating panel, a flat component carrier (23) is disposed, which comprises luminous elements (27) on a front side facing the operating panel and carries the flat sensor element (30), along with the sensor carrier (29), at the back in the region of the opening (17).
