Abstract (en)
[origin: EP2452602A1] The cleaner has a circuit carrier for a control electronic circuit arranged in a blower chamber. A pressure sensor is arranged in a region of the circuit carrier. A dust chamber is formed in a housing. The dust chamber is closed by a dust chamber cover. A dust chamber seal (16) is arranged between the housing and the dust chamber cover. The dust chamber seal serves as a sealing element for an air duct (23). The air duct conducts air from a detection area to the pressure sensor.
